WORK EXPERIENCE

Accenture Federal Services

Software Engineer / DevSecOps Lead

Oct 2010 - June 2025

- Worked across multiple agencies performing both Software Engineer & DevSecOps / Technical Architect Role
- Interviewed, hired and trained new employees in DevSecOps, programming, and testing roles.
- Worked as a Full Stack Developer on multiple federal projects working on enterprise applications - developing, deploying and managing multi-tiered, web-based applications across environments.
- Utilized leading Agile-Scrum Methodologies and became proficient in using many programming languages and frameworks.
- Worked as Lead Technical Architect to document, design, and implement environments for multiple projects, helping to satisfy client expectations.
- Engaged with client/customers to demo new functionality within web applications and used feedback to create new user stories.
- Worked with both a team of developers and functional team members, as well as individually, to help plan, design, code and unit test new web application functionality in Java, utilizing J2EE, JavaScript, JQuery, OOP, MVC, Spring Framework, Hibernate, JSP, HTML, & CSS.
- Helped create living documentation for development, deployment and support management roles across multiple projects.
- Provided 24/7, 265 support for multiple applications simultaneously, helping to investigate, identify and resolve Production webapp and deployment issues on a timely basis.
- Supported planned and unplanned releases & migrations during and outside of regular business hours.

Amplifire, LLC.

Co-Founder and Chief Technology Officer

June 2012 - October 2015

- Worked with bands, record labels, and companies to plan and implement advertising and promotional campaigns for product, tour and release promotions, as well as website, graphic design, and e-commerce platforms/shops.
- Performed comprehensive digital strategy reviews & social media optimization including graphic creation and branding across platforms, bio updates, daily/weekly posts, implementing tracking URLs and comprehensive reporting on advertising campaigns.
- Created and maintained a framework or schedule for recurring features and posts. Made suggestions for use of mailing lists, merchandise, or other digital platforms/media to be used.
- Specialized and Geo-targeted Tour promotion and ad campaigns on Facebook, Twitter & Instagram.
- Geo-targeted email marketing campaigns, as well as general business/project consultation.

SKILLS

- Proficient in: Java - J2EE, JavaScript, JQuery, OOP, MVC, Spring Framework, Hibernate, JPS, Nodejs, HTML5, CSS3, XML, YAML, Docker, bash and batch scripting, crontab, UNIX/LINUX basics.
- Familiar with PHP, ASP, Visual Basic, C++, .NET / dotnet
- Retains Basic understanding of computer networking, hardware & software. I have touched all pieces of the Development Lifecycle - from planning, server provisioning and configuration, to the source code development, testing, agile scrum, demoing to clients and application release & deployment.
- Good communication, problem solving and very good troubleshooting skills. Typically reliable worker, determined and trustworthy.
